

Recessed Entertainment Box (REB)

APPLICATION

The Leviton Recessed Entertainment Box (REB) is designed to flush mount into a wall cavity behind a display or cabinet providing a convenient recessed connection and power point for today's slim profile TV's. The REB centralizes device connection points for all AC power, audio, video, home theater, data, and phone connections. The REB enables consumers to take advantage of the latest technologies such as satellite TV, internet access, home networking, whole-house audio/video, and more. Flush-mounted on the wall, the REB installs practically invisibly behind wall units and entertainment centers, wall-mount flat screen TVs, and computer workstations. Perfect for both new construction and retrofit applications, the REB is a cost effective modular distribution point that is ideal for houses, apartments, co-ops, and condominiums.

REB, Low Profile Frame

RBH, High Profile Frame & Cover

SPECIFICATION

The REB shall be recess mountable in a typical 2X4 wall cavity. The REB shall support both new construction and retrofit installations. The REB Device Openings shall accept many industry standard metal and plastic "old work" style electrical boxes and low voltage rings. Shall be manufactured in paintable white ABS polymer. Shall include one blank Device Opening snap-in plate. Device Opening snap-in plate shall include a 1" KO. The High Profile Frame cover shall provide a slide in cover to hide internal wiring and components while providing a cable exit at the bottom of the frame for cable routing.

FEATURES

- Paintable white ABS molded plastic
- New construction (stud-mounted) and retrofit (wall-mounted) applications
- Utilizes "old work" junction boxes and low voltage mounting brackets
- Three device openings with any combination of line and low voltage products

MECHANICAL SPECIFICATIONS

Dimensions: See page 2

Materials: ABS molded plastic
